
PROFILE PAGE CUSTOMIZATION NOT WORKING

Posted by hivver - 2009/04/15 21:00

hi there B) , well i got this problem

it changes the background of the page wich is ok ;)

it changes the color link and decoration (actually also changes the decoration and color in the menu) its ok.

but it is not changing the background color/image on the profile page :(i tested with different pictures and formants /png/jpg/gif and none worked

:silly: any suggestions?

i downloaded the latest free version of customize tab plugin
joomla 1.5.6
cb 1.2
using yootheme template
